

Methyl Butyrate (MB), Battery Grade

SPECIALTY BATTERY ELECTROLYTE SOLVENT

PRODUCT OVERVIEW

Battery-grade methyl butyrate (methyl butanoate) is a high-purity, low-moisture ester solvent supplied for advanced battery electrolyte research and development. Winigen supplies MB in research-to-pilot quantities with controlled purity, water, and acid specifications.

PRODUCT INFORMATION	CAS No. 623-42-7
Molecular formula	C ₅ H ₁₀ O ₂
Molecular weight	102.13 g/mol
Alternate name	Methyl butanoate

TECHNICAL SPECIFICATIONS

PROPERTY	SUPPLIER SPECIFICATION	UNIT
Purity	≥99.8	%
Water	<20	ppm
Acid	<30	ppm

RESEARCH APPLICATIONS

Electrolyte-solvent screening, advanced battery electrolyte formulation, and related lithium-ion battery research and development. Suitability for a specific cell chemistry or process should be confirmed during evaluation.

PACKAGING & COMMERCIAL AVAILABILITY

Research-scale packages and bulk quantities are available. Refer to the Winigen Materials product page or request a quotation for current commercial options.

QUALITY / DOCUMENTATION

A lot-specific Certificate of Analysis is available for supplied material. Request current documentation and lot information before use. This document reports supplier-confirmed specifications only and does not publish representative-lot analytical results.
