

# Prop-1-ene-1,3-sultone (PST)

## ELECTROLYTE ADDITIVE

### PRODUCT OVERVIEW

Prop-1-ene-1,3-sultone (PST) is an electrolyte additive supplied for battery-electrolyte formulation, additive screening, and electrochemical research. This sheet summarizes specification limits and representative quality-control results.

### PRODUCT INFORMATION

CAS No. 21806-61-1 | Formula  $C_3H_4O_3S$  | Abbreviation PST

### TECHNICAL SPECIFICATIONS

| PROPERTY                       | SPECIFICATION                             | REPRESENTATIVE QC RESULT                  | UNIT |
|--------------------------------|-------------------------------------------|-------------------------------------------|------|
| Appearance                     | White crystalline material, no impurities | White crystalline material, no impurities | —    |
| Assay                          | ≥99.5                                     | 99.8969                                   | wt%  |
| Water (Karl Fischer titration) | ≤50                                       | 12.8                                      | µg/g |
| Chloride                       | ≤5                                        | 0.58                                      | µg/g |
| Sulfate                        | ≤20                                       | <20.0                                     | ppm  |

### REPRESENTATIVE QC HIGHLIGHTS

99.8969 wt% assay

12.8 µg/g water

### RESEARCH APPLICATIONS

Electrolyte formulation development; additive screening; cell-material compatibility studies; and electrochemical research. Suitability should be confirmed in the intended system.

### STORAGE / SHELF LIFE

360 days

### QUALITY / DOCUMENTATION

Specification limits and representative quality-control results are provided for technical reference. Lot-specific Certificate of Analysis is available upon request.

Supplied and technically supported by Winigen Materials.
